

Annual Accessibility Compliance Report

Prepared by: KPMG India | Subject: Audit | Language: English

Executive Summary

This report provides a comprehensive overview of our accessibility compliance initiatives for the fiscal year 2024. KPMG India is committed to ensuring all digital documents meet WCAG 2.1 AA standards and PDF/UA requirements.

Key Findings

- 98% of client documents now meet WCAG 2.1 AA standards
- Alt-text coverage increased from 72% to 96% across all reports
- Document tagging compliance improved by 24% year-over-year

[Figure 2: Document Type Breakdown]

Methodology

Our accessibility review process follows a rigorous three-stage approach: automated scanning, manual expert review, and user testing with assistive technologies. Each document is evaluated against PDF/UA-1 (ISO 14289-1) and WCAG 2.1 guidelines.

Recommendations & Next Steps

1. Implement Auto-Tagging Pipeline

Deploy automated PDF tagging tools across all document workflows to eliminate manual effort and ensure consistent structure tagging for headings, paragraphs, lists, and figures.

2. AI-Powered Alt-Text Generation

Integrate computer vision APIs to automatically generate descriptive alternative text for all images, reducing manual review time by an estimated 70%.

3. Standardize Metadata Templates

Enforce metadata templates across all business units ensuring title, author, language, keywords, and copyright information are consistently applied.

4. Quarterly Accessibility Audits

Schedule automated quarterly audits using PAC 3 and axe-PDF to proactively identify and remediate accessibility issues before document publication.
